CSS	Firebase	Terminal	Foundation	Prototyping
HTML	MySQL	Chrome DevTools	AngularJS	Adobe Suite
Gulp / Webpack	NodeJS	Wordpress/Wix	Bootstrap	Balsamiq

#Professional Experience

Web Developer Intern

Jumbo Capture West Lafayette, IN 47906 — January 2018 - May 2018

↳Built a revolutionary web-app with a team of developers to capture live feed from NCAA basketball games, and use facial recognition to detect spectators in each frame of the arena's jumbotron.

↳Utilized Frontend languages and framework to create an effective user interface. Organized tests with college students to understand strengths and weaknesses of product. After testing and numerous iterations, product was tested in the stadium in a crowd-filled game environment. (HTML, CSS, and Javascript, Python, Django)

↳Constructed a Backend with server and database that processed images for facial recognition and did CRUD operations. Software was created and successfully tested with the arena film room with live feed where we analyzed, manipulated, and optimized queries. (Python, SQL, OpenCV, FFMPEG, and PySceneDetect)

↳Composed app documentation resulting in Purdue University creating a legacy project for future students to work on.

Technical Support Intern

A10 Networks San Jose, CA 95134 — July 2016 - August 2016

↳Executed tasks with network engineering teams to troubleshoot, network servers, routers, switches, and load balancers. Advocated to address an issue in the data center of excess power usage. Consulted and worked with network engineers to make a remote power grid display application of all servers in data center facility to manage servers.

↳Collaborated with the support team to handle support tickets, update ticketing systems, and transfer troubleshooting documentation to a unified Salesforce management system.

Web Designer

AROY Thai Bistro & Thaiphoon Restaurant Palo Alto, CA 94043 — July 2016 - January 2018

↳Created websites for business that enabled online bookings, catering, and online menu thus allowing sales to come from an alternative untapped source. Monthly food catering events and reservation volume increased.

↳Modernization of website and created an online business identity, using quality food images, branding and print materials. Orchestrated the collection of email data using physical forms and managed it on MailChimp to do marketing and create dialogue between business and customers.

#Education

Purdue University / B.S Web Programming & Design — January 2016 - May 2018 West Lafayette, IN

U.C Berkeley Extension: Full Stack Dev. Bootcamp — November 2018 - May 2019 San Francisco, CA
